

Mini-course Starter Kit – Medicines safety

Introduction

This EUPATI Mini-course starter kit is designed for patient involvement in medicines safety.

EUPATI Mini-course starter kits have been derived from content found in the EUPATI toolbox and EUPATI Patient Expert Training Course. The starter kits are thought to address roles that patients play in medicines development for example those shown in the figure below.

Patient involvement in medicines R&D

Geissler, Ryll, Leto, Uhlenhopp
doi: 10.1177/2168479017706405

Patients can be involved across the process of medicines R&D. This diagram created by Geissler, Ryll, Leto, and

Uhlenhopp identifies some existing areas in which patients are involved in the process. It distinguishes between the level of expertise in a disease area that is required and the different areas where involvement can take place.

The starter kits provide you with links to relevant background reading in the toolbox and associated PowerPoint slide decks and media in order to prepare a single or multi-day training on the subject. Each of the starter kits contains a selection of PPT slides which you may use to educate patients/advocates about the “basics” in that area, e.g. in a two-hour to one-day seminar.

The starter kits are based on existing content from the EUPATI Toolbox, plus additional links to add-on Toolbox material. None of the “starter kits” are “ready-made course” modules – they are a ready-to-reuse resource for an experienced trainer to prepare and execute a course. You will need to edit them and put them into context.

Before you begin please **download** and **review** the ‘**Manual for Trainers**’: A manual for trainers describing how to use the EUPATI mini-course starter kits to create trainings on patient involvement.

Medicines Safety

This starter kit provides background reading, slides, and quizzes to create training for patients who intend to become involved in medicines safety.

[glossary_exclude]

Core reading

Efficacy and safety of medicines

Pharmacovigilance: Monitoring the safety of medicines

Principles of risk management

EudraVigilance

Risk Communication in medicines

Information on medicinal products

Optional

Generic medicines

Presentations

Pharmacovigilance: monitoring the safety of medicines (coming soon)

- **Presentation: Efficacy and Safety of Medicines**

Size: 373,525 bytes, Format: .pptx

A presentation describing the efficacy and safety of medicines, which can be adapted for own use.

- **Presentation: Principles of Risk Management**

Size: 372,303 bytes, Format: .pptx

A presentation describing the principles of risk management, which can be adapted for own use.

- **Presentation: EudraVigilance**

Size: 372,115 bytes, Format: .pptx

A presentation describing the EudraVigilance information system, which can be adapted for own use.

- **Risk-Communication-in-Medicines**

Size: 495,341 bytes, Format: .pptx

A presentation describing risk communication process in medicines, which can be adapted for own use.

- **Presentation: Information on Medicinal Products**

Size: 547,126 bytes, Format: .pptx

A presentation describing the information in medicinal products, which can be adapted for own use.

- **Presentation: Generic Medicines**

Size: 362,039 bytes, Format: .pptx

A presentation describing generic medicines, which can be adapted for own use.

Additional Learning Resources

Are you ready to elevate your expertise with certifications in areas like Clinical Development, Medicine Discovery, and HTA Evaluation?

Explore the links below to access the EUPATI Open Classroom, choose the courses that match your interests, and embark on your learning adventure today!

- Learn more about the Steps of Making a Medicine!
- Deepen Your Understanding of Medicinal Products!
- Grasp key concepts of Risk Communication used in Medicines Development!
- Deepen Your Understanding of Generic Medicines!
- Discover the key principles of Pharmacovigilance & Risk Management!
