

Patients Involved – HIV patients actively involved in multiple phases

Introduction

A case report on patients recruited by Janssen R&D in a program constructed for the EATG members. Afterwards, the course was handed over for further capacity building within their organisation without further company involvement.

When does it happen? – Strategic framework to Launch

Description of the case

Patient were involved as follows:

- Protocol design and review.
- Informed Consent Form (ICF) review.
- Participation in Drug Safety Monitoring Board (DSMB).
- Participation in Investigator Meeting.
- Building capacity in the area of Health Economics.

Janssen initiated also a collaboration with the London School of Economics and a tailor-made educational program was constructed for the EATG members. Afterwards, the course was

handed over for further capacity building within their organisation without further company involvement.

Type(s) of patient (advocates) involved

- Patients with personal disease experience (EATG, ELPA Treatment action group).
- Expert patient / patient advocate with good expertise on disease, but little R&D experience. (EATG, ELPA Treatment action group)
- Expert patient / patient advocate with good expertise on disease and good R&D experience. (EATG, ELPA Treatment action group)
- Pharmaceutical company Janssen

Benefits of patient involvement

Thanks to this collaboration we obtained:

- More targeted development.
- Better understanding of real needs for research and development.
- Faster study enrolment.
- Closer contacts between R&D experts and beneficiaries (motivational benefit).
- Better outcomes for patients.

Challenges and barriers

In disease areas outside HIV, professors and experts not always in favour of having patients on board.

We have discussed with them and showed EATG success example as model.

Learnings

Need to structure the process to ensure continuing process beyond individuals.

Patient literacy needs to be ensured to optimise feedback.

Ability to replicate this collaboration across more patient groups and advocates to increase knowledge on different topics, amongst other, Health Economics.
